AIDA
A TERRA
SUPERFÍCIE DO PLANETA
71% água
29% terra
Da terra,
22,6%
são deserto.
=
33,7
milhões de km²,
ou duas vezes a área da Rússia.
MAIORES DESERTOS DO PLANETA
O HOMEM
A densidade populacional média nos desertos é de
47 pessoas por km²
É o dobro do que ocorre no Brasil, com
22 pessoas por km²
A LUTA
Morre mais gente afogada que de sede nos desertos.
Culpa das inundações relâmpagos: tempestades curtas e fortes inundam áreas cujo solo absorve pouca água. Isso ocorre mais nos EUA e no norte da África.
